

Windows Server 2003 OS Support ended on July 14, 2015

August 29, 2016

Measurement made easy

As you are aware, Microsoft has ended its support for the Windows Server 2003 operating system on July 14, 2015.

- According to Microsoft, it means Windows Server 2003 users should take action. There will be no new security updates, non-security hotfixes, free or paid assisted support options or online technical content updates after July 14, 2015.
- Running Windows Server 2003 after July 14, 2015 may expose it to potential security risks because unsupported and unpatched computer operating systems are vulnerable to security risks.

Therefore, ABB Lewisburg can no longer guarantee compatibility with future releases of our products. All risk of operating any ABB Lewisburg applications on Windows Server 2003 after July 14, 2015 is assumed by the end user. ABB recommends that system upgrades should be planned in the near future.

Reminder

Microsoft has ended its support for the Windows XP operating system on April 8, 2014.
