Description

AMD actuators are used for the regulation of air dampers of 90° angle of rotation to be used in heating, ventilation and air conditioning applications (HVAC).

Features:

- Manual operation
- Rotation direction selection by switch
- Adjustable angle of rotation by mechanical end stop.
- Position indication
- Overload protection
- Direct mounting with universal spindle clamp
- Anti-rotation strap for preventing actuator from rotating
- Maintenance free

Main Data:

- Nominal voltage (AC or DC)
 - 230 V, 50/60 Hz
 - 24 V, 50/60 Hz
- Control Input signal: modulating or 2/3 point (depend on wiring)
- Torque: 20/30/40 Nm
- Rotation angle: 0- max. 95°
- Speed: 150 sec /90°

Operating mode

Valid for: AMD 610, 610AS, 710, 710AS, 810, 810AS

2-point.

Through connecting the power supply to BU+BN (1+2) and the direction of rotation switch on position "R" moves the actuator to position 1. Is also BK (1+2+3) connected to the power supply the actuator is moving to position 0.

3-point.

Through connecting the power supply to BU+BN (1+2) and the direction of rotation switch on position "R" moves the actuator to position 1. If the power supply is interrupted the actuator maintains its current position. Is also BU+BK (1+3) connected to the power supply the actuator is moving in direction 0.

The actuator is overload-proof, requires no limit switches and automatically stops when the end stop is reached.

Valid for: AMD 620, 620AS, 720, 720AS, 820, 820AS

Through connecting the power supply to BU+BN (1+2) and a reference signal Y to BK (3) of 0(2)...10VDC, moves the actuator to its specified position. The actual damper position 0...100% is a feedback signal U for example to share the signal with other actuators.

The actuator is overload-proof, requires no limit switches and automatically stops when the end stop is reached.

Direct mounting

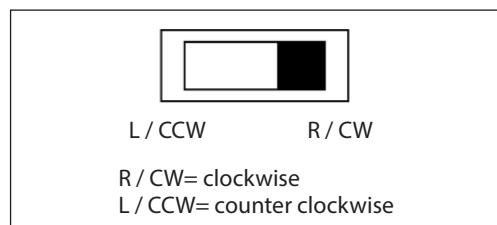

Simple direct mounting on the damper spindle with a universal spindle clamp, supplied with an anti-rotation strap to prevent the actuator from rotating.

Manual operation

Manual operation is possible with the self-resetting pushbutton (the gearing latch remains disengaged as long as the pushbutton is pressed)

Rotary direction switch

Valid for AMD:
(610, 610AS, 710, 710AS, 810, 810AS)

Adaption drive (Adp)

Valid for AMD:
(620, 620AS, 720, 720AS, 820, 820AS)

- Adaption on angle of rotation < 90°
 - Actuator power-off
 - Setting the mechanical end stops
 - Actuator power-on
 - Adaption to enable
 - Actuator adaption on angular range
 - Adaption to disable
 - "Y" refers to the measured angular range

Auxiliary switches

Valid for AMD:
(610AS, 620AS, 710AS, 720AS, 810AS, 820AS)

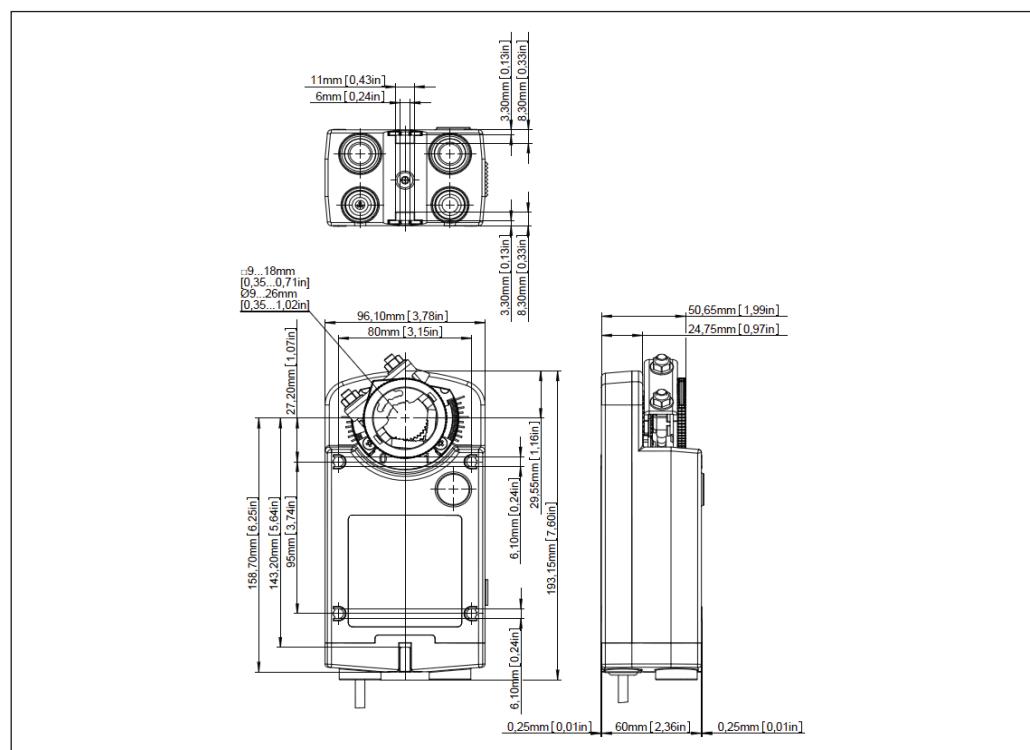

Installation

The actuators should be mounted in a dry environment, absolutely free from acrid fumes. In case of outdoor installation, the actuator has to be protected against climatic influences by suitable measures.
